MG BHIVE release SPAX adjustable suspension conversion kit for MGB

Front Conversion
£199.00

Leading MGB specialists - MG BHIVE - have linked up with SPAX suspension to produce a specially designed tubular damper conversion for the MGB. If you're proud of your classic MGB but yearn for more modern handling, this is just the thing for you. This adjustable rate suspension kit converts the original lever arm front suspension to telescopic gas dampers and will transform the handling and road holding of the car, both on the road and on the track.

The kit contains solidly built conversion brackets and mounts to install the new SPAX dampers. The kit even includes longer stainless steel brake hoses to suit the new configuration along with all the required bolts and fixings. The conversion not only provides adjustable damping rates but allows the rate to be adjusted on the car.

Each kit is dyno tested to ensure quality and performance before it leaves the factory and the dampers feature the unique SPAX triple wiper seal design to ensure a long life.

The dampers are finished with a blue epoxy powder coating to ensure their good looks are maintained. The Beehive MGB Front Conversion Kit is available at just £199.00 making it superb value for money. Versions are available for both chrome bumper early models and rubber bumper late models. A rear conversion is also available priced at £115.00.
