SPAX Adjustable Ride height Suspension Kit for New BMW Mini

SPAX Performance Ltd have just released a fully adjustable suspension kit to fit the New BMW Mini that allows both the damping rate and the ride height to be adjusted.

The **SPAX adjustable suspension kit** for the New Mini is height adjustable using coil overs at the front and rear. The kit offers a real improvement in suspension 'feel' and handling, the ability to lower the car to give the stance most owners seek and still offer it at an **affordable price**.

The **SPAX kit contains rate and height adjustable front struts and rear dampers** with race internals which are matched to **race chrome silicon springs**. This matching is all-important for proper and precise handling and the result is 'near-race' performance not to mention incredible looks. This kit has progressive rate rear springs for added comfort and increased stability.

All height and damping adjustments can be carried out **on the car** for quick, easy and precise tuning of suspension settings. The car can be **lowered by any amount from 10 mm to 40 mm**.

SPAX quality is universally well known. SPAX is one of the very few British companies (in any field of manufacturing - not just the motor industry!) to have achieved **German TUV approval**. Each **SPAX** kit is dyno tested to ensure quality and performance before it leaves the factory and all dampers feature the unique **SPAX triple seal design** to ensure a long leak-free life.

Thanks to the new lower SPAX pricing policy the recommended retail price for this **SPAX RSX** kit is **just £649.99** including VAT - a great kit at a truly affordable price.

For further details contact your local SPAX dealer or visit their website: www.spaxperformance.com.

Lowers car between 10 mm and 40mm!
