## SPAX Adjustable Ride height Suspension Kit for Classic Mini

SPAX Performance Ltd have a fully adjustable suspension kit to fit the Classic

Mini that allows both the damping rate and the ride height to be adjusted. The shock absorber/coil over spring set up is suitable for fast road use and limited tarmac competition events. It is even tough enough to be used off road if suitable strengthening modifications are made to the vehicle itself. The dampers feature offset mounting pins to allow most 10", 13" and the standard 12" wheels to be used without fouling.

The **SPAX kit contains rate and height adjustable front and rear dampers** with race internals which are matched to **race chrome silicon springs**. This matching is all-important for proper and precise handling. This kit has progressive rate rear springs for increased stability.

All height and damping adjustments can be carried out **on the car** for quick, easy and precise tuning of suspension settings.

**SPAX** quality is universally well known. SPAX is one of the very few British companies (in any field of manufacturing - not just the motor industry!) to have achieved **German TUV approval**. Each **SPAX** kit is dyno tested to ensure quality and performance before it leaves the factory and all dampers feature the unique **SPAX triple seal design** to ensure a long leak-free life.

Thanks to the new lower SPAX pricing policy the recommended retail price for this **SPAX RSX** kit is just **£499.99** including VAT - a great kit at a truly affordable price.

For further details contact your local SPAX dealer or visit their website: [www.spaxperformance.com](http://www.spaxperformance.com).
