## SPAX Adjustable Ride Height Suspension Kit for BMW Mini Cooper 'S'

**SPAX Performance Ltd** are sole suppliers of all John Cooper 'works' suspension kits for all Mini models, so who better to develop a fully adjustable suspension upgrade for the new Cooper 'S' than SPAX?

First impressions of the Cooper 'S' suggest that it looks a little high, especially from the rear. The **SPAX adjustable suspension kit** for the new Cooper 'S' is height adjustable from 0-30 mm at the front and rear. and gives owners the ability to lower the car to give the stance most owners seek but still offer it at an **affordable price**.

The **SPAX kit contains 4 rate and height adjustable coil over dampers**. The use of 2.25" springs allows larger diameter wheels to be fitted if required without fouling the suspension.

All damping adjustments can be carried out **on the car** for quick, easy and precise tuning of suspension settings and the ride height can be adjusted by use of the 'C' spanners provided.

**SPAX** quality is universally well known. **SPAX** is one of the very few British companies (in any field of manufacturing - not just the motor industry!) to have achieved **German TUV approval**.

Each **SPAX** kit is dyno tested to ensure quality and performance before it leaves the factory and all dampers feature the unique **SPAX triple wiper seal design** to ensure a long leak-free life.

The **SPAX adjustable suspension kit** for the new Cooper 'S' retails at just £649.99 including VAT.

For further details contact your local SPAX dealer, John Cooper Garages, or visit our website: [www.spaxperformance.com](http://www.spaxperformance.com).
