# SPAX launch CSX range of competition dampers

Leading suspension specialists, **SPAX Performance Ltd** have just introduced a completely new range of 'blue blooded' steel bodied competition dampers featuring flexible specification and a budget price.

Spax CSX dampers are individually hand built for ultimate performance, quality and consistency. They are fully computer dyno tested before they leave the factory and can be rebuilt by SPAX technicians

CSX dampers feature narrow, lightweight CNC machined bodies and sculpted base for low unsprung weight and strength, and exceptional stroke to length ration and a long adjustable spring pan for flexibility of fitting locations.

CSX dampers offer 28 stages of bump and rebound adjustment which can be adjusted while the damper is on the car allowing the suspension to be quickly and easily adjusted to suit different driving styles.

Various valving options are available (3:1 standard) as are various end fittings and bump stop options to give greater flexibility of fitting and improved speed of fitting. For an extra fee the dampers can also be made so that they can be run upside down.

CSX dampers are available in a wide range of sizes from 9" to 22" (with more planned for introduction soon) and a retail price of just £99.99 plus VAT each making them ideal for all competitors from clubman level up.

For further details contact your local SPAX dealer or visit their website: [www.spaxperformance.com](http://www.spaxperformance.com).
