SPAX Adjustable Suspension Kit for Fiesta Mk 4

Leading suspension specialists, **SPAX Performance Ltd** have just added the Fiesta Mk 4 to their list of PSX adjustable suspension kit applications.

The **SPAX PSX adjustable suspension kit** contains **four 28 stage rate adjustable dampers** which are matched to **uprated chrome silicon springs** that represent a dramatic improvement over standard specification springs. Note that both the rear dampers and the front struts have 28 stage adjustment allowing the driver to tune the suspension more precisely than ever before.

The damping adjustments can be carried out **on the car** for quick, easy and precise tuning of suspension settings.

As with all **SPAX Suspension Kits**, quality is paramount and this is underlined by the fact that SPAX is one of the very few British companies to have achieved **German TUV approval**.

Each **SPAX** kit is dyno tested to ensure quality and performance before it leaves the factory. All dampers feature the unique **SPAX triple oil seal design** to ensure a long leak-free life and a final epoxy powder coating ensures a lasting superb finish to complete the ultimate performance package.

New for 2004 - All SPAX adjustable dampers are **now filled with high pressure krypton gas** to further enhance their performance and reliability. The name krypton might suggest something out of science fiction or superheroes comicbooks, but there is a serious side to the matter. Krypton is an inert gas that is incredibly stable even under high pressure (so stable in fact that the wavelength of krypton is used to define the benchmark for the measurement of the metre!), making it ideal for use in heavy duty dampers. Krypton's thermodynamic properties ensure there is no fading of the damping action and because it is an element there is no water inside the damper to cause rust. Both the low speed ride and the high speed performance are improved. To utilise krypton SPAX have had to adapt all their valving and further upgrade their seals, but in spite of all these improvements and the fact that krypton costs around eight times the cost of nitrogen (the usual choice of gas suspension manufacturers) SPAX have managed to keep their attractive price structure. Furthermore, the improved standards mean that SPAX can now offer a **LIFETIME WARRANTY** on all their krypton filled dampers making for even more peace of mind.

SPAX PSX kit for Fiesta Mk 4 '96 to '02 models. **£399.99 including VAT**
