# SPAX Adjustable Ride height Suspension Kit for VW Golf Mk1

**SPAX Performance Ltd** have suspension kits for all the current Golf and Beetle models, but they still have time for owners of older classic models, and to prove it they have just announced a fully ride height and damper rate adjustable suspension kit for the classic Mk 1 Golf.

The **SPAX adjustable suspension kit** for the Golf Mk1 is height adjustable at the front and rear. The kit offers a real improvement in suspension 'feel' and handling, the ability to lower the car to give the stance most owners seek and still offer it at an **affordable price**.

The **SPAX kit contains 2 rate and height adjustable coil over front struts and 2 rate adjustable dampers** with race internals and **chrome silicon springs with height adjustable seats for the rear**. The use of 2.25" springs allows larger diameter wheels to be fitted if required without fouling the suspension. The ride height drop is adjustable from 30mm to 60mm for road and race purposes but lowering of up to 80mm can be achieved with this kit, although such extreme lowering is really only for show use.

All damping adjustments can be carried out **on the car** for quick, easy and precise tuning of suspension settings and the ride height can be adjusted by use of the 'C' spanners provided.

**SPAX** quality is universally well known. **SPAX** is one of the very few British companies (in any field of manufacturing - not just the motor industry!) to have achieved **German TUV approval**.

Each **SPAX** kit is dyno tested to ensure quality and performance before it leaves the factory and all dampers feature the unique **SPAX triple wiper seal design** to ensure a long leak-free life.

For further details contact your local **SPAX** dealer or visit our website: [www.spaxperformance.com](http://www.spaxperformance.com).
