SPAX Adjustable Dampers for Jensen Interceptor

Leading suspension specialists, SPAX Performance Ltd have just introduced an adjustable suspension damper for the Jensen Interceptor. The 28 point adjustable damper will not only restore performance but will make it handle even better than before, making this classic Gran Tourer safer on 21st century roads.

The new SPAX dampers will also prove useful to owners who want to use their car to its full potential on the track since the rate adjustable dampers have race internals. The damping adjustments can be carried out on the car for quick, easy and precise tuning of suspension settings.

As with all SPAX Suspension Components, quality is paramount and this is underlined by the fact that SPAX is one of the very few British companies to have achieved German TUV approval. Each SPAX unit is dyno tested to ensure quality and performance before it leaves the factory. Triple oil seal design to ensure a long leak-free life.

The recommended retail price for the SPAX adjustable damper for the Jensen Interceptor is £54.99 each including VAT.

SPAX dampers for classic cars are supplied in black as standard, but are available in SPAX yellow as a no-cost option.

For further details contact your local SPAX dealer or visit their website: www.spaxperformance.com.
