SPAX SSX Up-rated Lowering Springs for Mazda MX5 Mk2 Roadster

Leading suspension specialists SPAX have just released a performance suspension spring package for Mazda MX5 owners who wish to improve their car's handling for more enjoyable fast road driving.

SPAX SSX springs are cold wound, silicon springs - so there's no doubting the technology and quality involved. Just because SPAX springs are sensibly priced they shouldn't be confused with other springs you may have seen. SPAX Performance is run by genuine enthusiasts who not only design and manufacture premium quality suspension components but actually race and attend trackdays themselves and as such are their own toughest critics.

SPAX SSX springs for the Mazda MX5 will lower the car by 40mm making for better stability and improved looks.

At just £104.99 a set of SPAX SSX springs must be one of the best value and worthwhile improvements any enthusiastic MX5 owner could make.
