SPAX Release Adjustable Suspension Conversion Kit for MG Midget

If you're proud of your classic MG but yearn for more modern handling, SPAX Performance Ltd have just the thing for you. SPAX Performance Ltd have released an adjustable rate suspension kit to fit MG Midget Mk1, Mk2 and Mk5 models.

The kit converts the original lever arm front suspension to telescopic gas dampers and will transform the handling and road holding of the car, both on the road and on the track.

The kit contains solidly built conversion brackets and mounts to install the new SPAX dampers. The kit even includes longer stainless steel brake hoses to suit the new configuration along with all the required bolts and fixings.

The conversion not only provides adjustable damping rates but allows the rate to be adjusted on the car.

As with all SPAX Suspension Kits, quality is paramount. Each kit is dyno tested to ensure quality and performance before it leaves the factory. Dampers feature the unique SPAX triple wiper seal design to ensure a long life. All SPAX dampers are now epoxy powder coated to ensure their good looks are maintained.

The SPAX MG Midget Mk1 and Mk5 Front Conversion Kits are available from all appointed SPAX dealers at just £199.99 each incl. VAT making them superb value for money. A version is available for the Midget Mk2 at just £249.99 including VAT.

For further details contact your local SPAX dealer or visit their website: www.spaxperformance.com.
