Peugeot 205 Adjustable Ride height Suspension Kit from SPAX

SPAX Performance Ltd have just released a fully adjustable suspension kit to fit the Peugeot 205 that allows both the damping rate and the ride height to be adjusted.

The SPAX adjustable suspension kit for the 205 is height adjustable at the front using coil over struts and is damper rate adjustable at the rear. The kit offers a real improvement in suspension 'feel' and handling, the ability to lower the car to give the stance most owners seek and still offer it at an affordable price.

The SPAX kit contains 2 rate and height adjustable front struts and 2 rate adjustable rear dampers with race internals which are matched to race chrome silicon springs. This matching is all-important for proper and precise handling and the result is 'near-race' performance not to mention incredible looks.

All damping adjustments can be carried out on the car for quick, easy and precise tuning of suspension settings and the front ride height can be adjusted by use of the 'C' spanners provided. The front of the car can be lowered by any amount from 50mm to a super-radical 90 mm!

The SPAX quality is universally well known. SPAX is one of the very few British companies (in any field of manufacturing - not just the motor industry!) to have achieved German TUV approval. Each SPAX kit is dyno tested to ensure quality and performance before it leaves the factory and all dampers feature the unique SPAX triple wiper seal design to ensure a long leak-free life.

Thanks to the new lower SPAX pricing policy the recommended retail price for this SPAX RSX kit is just £499.99 including VAT - a great kit at a truly affordable price.
