SPAX Adjustable Suspension Kit for Honda Civic

Leading suspension specialists, **SPAX Performance Ltd** have just added the Honda Civic to their list of PSX adjustable suspension kit applications.

The SPAX PSX damper rate adjustable suspension kit will fit Honda Civic models made from 1987 to 2001.

The **SPAX PSX adjustable suspension kit contains four 28 stage rate adjustable dampers** which are matched to **uprated chrome silicon springs** that represent a dramatic improvement over standard specification springs. Note that all the dampers have 28 stage adjustment allowing the driver to tune the suspension more precisely than ever before.

The damping adjustments can be carried out **on the car** for quick, easy and precise tuning of suspension settings.

As with all **SPAX Suspension Kits**, quality is paramount and this is underlined by the fact that SPAX is one of the very few British companies to have achieved **German TUV approval**.

Each **SPAX** kit is dyno tested to ensure quality and performance before it leaves the factory. All dampers feature the unique **SPAX triple oil seal design** to ensure a long leak-free life and a final epoxy powder coating ensures a lasting superb finish to complete the ultimate performance package.

SPAX PSX kit for Honda Civic 1997 - 2001 from **£349.99 including VAT**
