# **SPAX SSX Uprated Lowering Springs for Renault Clio 2litre**

One of the first modifications most people make to a car is to uprate the suspension and lower the centre of gravity to improve handling and looks.

The new Clio 2 litre must be one of the most popular candidates for modification there is, so leading suspension specialists, **SPAX Performance Ltd** have introduced a spring kit for this model to allow you to make a start in great style - and at a low cost.

The **SSX kit contains two uprated chrome silicon springs** which represent a dramatic improvement over standard specification springs.

As with all **SPAX products**, quality is paramount and this is underlined by the fact that SPAX is one of the very few British companies to have achieved **German TUV approval**.

For further details contact your local SPAX dealer or visit their website:
